Filling The Gap

ITD 04/16/10 US-95, Wyoming Ave. To SH-53 10/30/10

The first phase of the project will construct the new northbound (NB) lanes and make temporary connections to the existing roadway at the project limits. Phase II will construct temporary cross-overs at each end of the project, demolish the existing roadway and construct the new southbound (SB) lanes.

Travelers familiar with the recently completed US-95, SH-53 To Ohio Match, project will not be surprised by the lane changes. In the first phase, NB & SB traffic will be split by a wide median. In phase II, NB & SB will consist of two way traffic on the new NB alignment, and when finished traffic will have full use of four lanes from I-90 through Chilco.

- Lane restrictions on US-95 between 09:00pm -05:00am only.
- No roadwork June 27th weekend of the triathlon.
- Lancaster & Boeckel will not be closed on the same side of US-95 at the same time.
- Local access will be maintained at all times.
